

ontologies taxonomies and thesauri pdf

In computer science and information science, an ontology encompasses a representation, formal naming, and definition of the categories, properties, and relations between the concepts, data, and entities that substantiate one, many, or all domains.. Every field creates ontologies to limit complexity and organize information into data and knowledge.As new ontologies are made, their use hopefully ...

I'd like to propose a new addition to the list. Textalytics is a Meaning as a Service product, offering verticalized semantic APIs, optimized for several applications and industries: Media Analysis, Semantic Publishing, etc. along with more granular basic linguistic/semantic functionality.

Listing of 185 Ontology Building Tools | AI3:::Adaptive

The Web Ontology Language (OWL) is a family of knowledge representation languages for authoring ontologies.Ontologies are a formal way to describe taxonomies and classification networks, essentially defining the structure of knowledge for various domains: the nouns representing classes of objects and the verbs representing relations between the objects.

Lexical and Classification Resources. This page offers dictionaries, thesauri, classification schemes, and related matter primarily of use to those managing preservation libraries, imaging projects, documentation systems, etc.

Lexical and Classification Resources

This article presents the field of knowledge organization (KO) and its core perspectives: knowledge organization processes (KOPs) and knowledge organization systems (KOS). It provides a brief overview of research traditions, approaches and basic theoretical issues in the field (practicalist and intuitivist approaches, consensus-based approaches, facet-analytic approaches, user-based and ...

Knowledge organization (IEKO)

Prof. Dr. Knut Hinkelmann 6 Classification Schemes 3 Classification Classification is an organization means arranging information items into classes - dividing the universe of information into manageable and logical portions. A class or category is a group of concepts that have something in common. This shared property gives the class its identity.

6 Classification Schemes - Hinkelmann

Metadata management (RDF) Structure your research, investigation, navigation, document sets, collections, metadata forms or notes in a Semantic Wiki, Drupal or another content management system (CMS) or with an innovative annotation framework with taxonomies and custom fields for tagging documents, annotations, linking relationships, mapping and structured notes.
