

pesticides and nature conservation pdf

Conservation is an ethic of resource use, allocation, and protection. Its primary focus is upon maintaining the health of the natural world, its fisheries, habitats, and biological diversity. Secondary focus is on material conservation, including non-renewable resources such as metals, minerals and fossil fuels, and energy conservation, which is important to protect the natural world.

Conservation (ethic) - Wikipedia

Pesticide use raises a number of environmental concerns. Over 98% of sprayed insecticides and 95% of herbicides reach a destination other than their target species, including non-target species, air, water and soil. Pesticide drift occurs when pesticides suspended in the air as particles are carried by wind to other areas, potentially contaminating them.

Interim Final Rule Issued for the Safe Management of Recalled Airbags. In response to the Takata airbag recall, EPA determined that changes to the hazardous waste rules were needed to facilitate the collection of defective airbags, decreasing the risk of death and serious injury from airbags still in vehicles.
