The falling cat problem is a problem that consists of explaining the underlying physics behind the observation of the cat righting reflex: that is, how a free-falling body can change its orientation such that it is able to right itself as it falls to land on its feet, irrespective of its initial orientation, and without violating the law of conservation of angular momentum.

### **Falling cat problem - Wikipedia**

The cat or domestic cat (*Felis catus*) is a small carnivorous mammal. It is the only domesticated species in the family Felidae. The cat is either a house cat, kept as a pet; or a feral cat, freely ranging and avoiding human contact. A house cat is valued by humans for companionship and for its ability to hunt rodents. About 60 cat breeds are recognized by various cat registries.

IMPORTANT: Even in the best case scenarios relocation can be very dangerous for cats and ineffective. Relocation is stressful for cats and since community cats are not socialized to people they can be unpredictable. Community cats bond to their outdoor homes and will try to go back—in some cases cats have died in the process, when people misguidedly believe that their life will be better ...

Diet is the brick and mortar of health. This web page lays out some often-ignored principles of feline nutrition and explains why cats have a better chance at optimal health if they are fed canned food (or a balanced homemade diet) instead of dry kibble.. Putting a little thought into what you feed your cat(s) can pay big dividends over their lifetime and very possibly help them avoid serious ...
