To date, there are few specific guidelines published on the optimal approach to cavitary lung disease.<sup>1, 2</sup> The intention of this review is to highlight the specific clinical, laboratory, and radiographic features that can help guide clinicians in their approach. For purposes of this report, radiographic findings refer to abnormal chest imaging features seen on CT scans of the chest.

Pathogenic bacteria are bacteria that can cause disease. This article deals with human pathogenic bacteria. Although most bacteria are harmless or often beneficial, some are pathogenic, with the number of species estimated as fewer than a hundred that are seen to cause infectious diseases in humans. By contrast, several thousand species exist in the human digestive system.

**INTRODUCTION** Sepsis is a clinical syndrome characterized by systemic inflammation due to infection. There is a continuum of severity ranging from sepsis to septic shock. Although wide-ranging and dependent upon the population studied, mortality has been estimated to be 10 percent and 40 percent when shock is present [1]. In this topic review, the management of sepsis and septic shock ...
