The World Health Organization (WHO) ranked the health systems of its 191 member states in its World Health Report 2000. It provided a framework and measurement approach to examine and compare aspects of health systems around the world. It developed a series of performance indicators to assess the overall level and distribution of health in the populations, and the responsiveness and financing ...

Self-organization, also called (in the social sciences) spontaneous order, is a process where some form of

overall order arises from local interactions between parts of an initially disordered system. The process is spontaneous, not needing control by any external agent. It is often triggered by random fluctuations, amplified by positive feedback. The resulting organization is wholly ...

Self-organization - Wikipedia

A corollary of the dictum that systems of action must not be mixed is that no single organization should be expected to solve all problems.
